

Senior Frontend Developer (VueJs)

We are a young and venture-backed team with the goal of revolutionising the sub-metering and energy market. At Messhelden we are passionate about developing state of the art technology to analyze individual energy consumption and improve energy efficiency (www.messhelden.com). For this exciting new opportunity in the fast growing property tech sector, we are looking for a dedicated Senior Frontend Developer to join our team in Berlin.

Your role:

- You develop the interface of our meter and gateway management (A single Vue.js web app which manages our IoT devices and gateways as well as their communication)
- You maintain and extend the Vue.js (+ Vuetify) architecture
- You integrate our {json:api} api and take responsibility for using it in a performant and efficient way
- You implement visualizations for live data feeds (meter heartbeats, meter data, gateway data, decryption/decoding queue)
- You analyze usage and performance data to improve features
- You come up with, research, and test your own ideas to further ensure and improve upon existing data and performance benchmarks
- You take ownership of the UX and usability of the interfaces you build

Your qualifications:

- Strong logical thinking skills and proven persistence in problem solving (e.g. achieved through a BSC or MSC. in Math, Computer Science or Engineering)
- 3+ years of work experience in web development and software engineering
- Experience with VueJs or similar frontend frameworks/libraries (e.g. Angular, React)
- Comfortable writing feature specs and have some exposure to or interest in TDD
- Very good communication skills and comfortable working in an English speaking team
- Bonus: exposure to and interest in Agile development methods/practices (Scrum, Kanban, Lean, etc)
- Bonus: You are more a generalist than a specialist, that is you had exposure to adjacent topics like UI/UX design, Quality Assurance, Data Science, Design Thinking

What we offer:

- A very deep stack, from low level data to processing and visualization, not another crud app
- Join a promising early stage startup within an exciting sector of property & energy management which we are disrupting via digitalization and innovation
- The option to take more responsibilities over time and take the next step in your career path, e.g. becoming Lead Frontend Designer
- Profit from working closely with experienced serial entrepreneurs who co-founded 3 successful companies within the last 10 years
- Freedom to design and use the latest technologies where relevant (“Best tool for the job” approach)
- Stay on top of current industry trends and join tech conferences to present your work, and meet-ups all around the globe
- Competitive salary with the option of company shares
- Drinks, games, and company catch up every Friday (non compulsory!)
